

YOGENDHAR SRI RAM BOLISETTI

Full-Stack Developer | MERN + Angular | AI/ML Integration Specialist

Hyderabad, Telangana 500083, India | +91 9951976339

yogendharboliseti@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building scalable MERN, Angular, and Python-based applications for government, insurance, telecom, FMCG, and manufacturing sectors. Specialized in Agentic AI systems, document intelligence, dashboards, and automation workflows. Proven expertise in React, Angular 19, Node.js, Python, and Azure deployment with MSAL authentication. Track record of delivering production-ready AI-powered solutions serving millions of users with 35% performance improvements and 50% increased feature adoption.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Frontend:** React.js, Angular 19, Redux, Material-UI, Bootstrap, TailwindCSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB, NoSQL
- **AI/ML:** RAG Workflows, Agentic AI, ChatGPT/Gemini Integration, LangChain, Document Intelligence
- **Cloud & DevOps:** Microsoft Azure (Static Web Apps, Web Apps, RBAC, AD Auth), Git
- **Tools:** Power BI Embedded, VS Code, Git, MSAL Authentication, JWT, RBAC

KEY ACHIEVEMENTS

- Improved UI performance by **35%** through reusable components, optimized rendering, and responsive layouts across Angular and React applications
- Enhanced backend efficiency by **40%** via optimized APIs, scalable data pipelines, and faster time-series filtering using Python and Node.js
- Increased AI feature adoption by **50%** by integrating ChatGPT, Gemini, and RAG-based agentic workflows for summarization, conflict detection, and Q&A
- Reduced water treatment chemical usage by **38%** through ML-optimized SCADA system integration
- Cut tender review time by **70%** with AI-powered document analysis and automated conflict detection

PROFESSIONAL EXPERIENCE

Developer | Tata Consultancy Services Limited

February 2022 – Present

Hyderabad, India

AI Tender Advisor – Agentic AI POC (*React, Redux, Recharts, TailwindCSS, Python*)

- Designed Agentic AI system for automated tender analysis with multi-step reasoning across documents, corrigendums, and technical specifications.
- Built responsive UI with Angular and Tailwind CSS including dynamic tables, AI dashboards, and interactive chat interface for real-time Q&A.
- Implemented document conflict detection and clause comparison, reducing manual review effort by 70%.
- Developed AI-powered Q&A and summarization using RAG workflows with citation-backed answers for eligibility, compliance, and financial terms.
- Automated parameter extraction and corrigendum impact analysis, improving transparency and decision-making.

Water Treatment Copilot – UK Water Utility (*React, Redux, Recharts, TailwindCSS, Python*)

- Transformed water treatment workflows with AI-enabled processes, achieving 38% reduction in chemical usage.

- Developed optimized UI screens using React, Redux, Tailwind CSS, and Recharts for real-time treatment metrics.
- Integrated ML models on SCADA data to optimize chemical dosage and minimize manual intervention.
- Designed digital logging system replacing manual operator diaries, improving data traceability and audit readiness.
- Implemented Agentic RAG workflows for extracting insights from SOPs and technical manuals.

FMCG Analytics Dashboard (*React, Redux, Material-UI, Power BI*)

- Integrated Power BI reports into React application, reducing dashboard development time by 40%.
- Deployed solution on remote server with secure access and high availability.
- Developed multiple interactive Power BI reports with save/edit modes tailored to client needs.
- Improved data accessibility and decision-making by embedding dynamic dashboards.

Telecom AI-Enhanced Dashboard & Assistant (*Angular, Bootstrap, Python, Generative AI*)

- Developed enterprise-grade UIs using Angular for leading telecom client with high performance and scalability.
- Integrated Power BI embedded analytics enabling real-time KPI visualization.
- Built intelligent AI assistant chat interfaces improving user efficiency by 35%.

AI-Smart Factory Innovation Suite – TCS POC (*Angular, Python, Generative AI*)

- Led development of 6+ Generative AI and Agentic AI use cases automating issue classification, SOP lookup, and root-cause analysis.
- Designed intelligent AI assistants for manufacturing guidelines and troubleshooting, improving operator efficiency by 45%.
- Earned high recognition at TCS Innovasta for innovation and real-world applicability.
- Optimized LLM workflows reducing response latency while ensuring secure document handling.

Insurance Platform – Generali (*React, Redux, Material-UI, Python, GPT/LLMs*)

- Engineered responsive UI screens using React, Redux, and Material-UI, reducing UI-related defects.
- Integrated AI-powered conversational assistant with GPT, accelerating query resolution by 40%.
- Developed GPT-based PDF Intelligence Module for structured policy document data extraction.
- Implemented agentic AI workflows for automated request classification and processing.

Indian Government Portals – ECI (*React, Redux, Material-UI, Bootstrap*)

- Developed responsive UIs for government portals (NVSP, NGSP, ETPBMS) serving millions of users
- Optimized performance through rigorous testing and critical issue resolution for high-traffic platforms
- Enhanced user experience with responsive design and reusable components

EDUCATION

Bachelor of Technology – Nalla Narasimha Reddy Education Society's Group of Institutions
August 2017 – September 2021 | CGPA: 6.88
